

St. John's Marsh Wildlife Area Habitat Development Plan

Restoration Plan Database: Crystal Reports of Individual Plan Summaries

I. BASIC PLAN DATA

Plan name:

St. John's Marsh Wildlife Area Habitat Development Plan

Brief description of plan:

In 1976, the Michigan Natural Resources Commission approved and dedicated 3000 acres of wetlands as the St. John's Marsh Wildlife Area. This area is located along the NE shoreline of Anchor Bay, Lake St. Clair. Management concepts are geared toward following the primary goal, which is to preserve, protect and enhance existing marsh and upland habitats to meet the needs of breeding and migratory waterfowl along with other wildlife species, while providing practical recreational opportunities for the benefit of all people.

Region the plan is located within:

Great Lakes Region

Watershed(s) included within the plan:

L082x

Area plan covers (in square miles):

square miles

Plan scale:

County

Plan's lead organization(s):

Michigan Department of Natural Resources Wildlife Division

Plan's Main Contact Information:

No Information Provided

On-line version of plan:

Date of original plan:

4/1992

II. TECHNICAL INFORMATION

Plan includes restoration goals: Y

Level of detail of the goals:

G

Summary of the goals:

Preserve, protect and enhance existing marsh and upland habitats (3000 acres) to meet the needs of breeding and migratory waterfowl along with other wildlife species, while providing practical recreational opportunities for the benefit of all people.

Plan recommends restoration of specific project sites:

N

Plan includes a discussion of funding sources:

N

Plan addresses long-term protection of restored sites:

Y

Partners included in developing the plan:

No Partners were involved

Type(s) of public outreach included during plan development:

Information not available

Plan includes public outreach as part of plan implementation (e.g. annual public meeting, local group participation):

N

Plan discusses the application of innovative approaches to restoration:

N

Plan make use of GIS mapping capabilities:

N

Plan addresses monitoring/reference sites for ecosystem level monitoring (baseline conditions) by:

N

Plan addresses monitoring/reference sites for project level monitoring by:

N

The plan discusses or coordinates with other restoration plans covering the same geographic area:

N

Other plan names:

Plan contains detailed information on historic and/or current habitat size, rate of loss, acres restored or protected, etc.):

Y

Summary of this habitat information:

Current size of the marsh area is 3000 acres.
